

Dear Members,

Our organization is looking for volunteers to participate in our research project. Your dedication and participation is greatly appreciated and important to the success of this project in CHAI. The purpose of this study is to identify health indicators shown in handwriting. This study will be used to support the core research on brain impairment seen in handwriting.

In order to qualify to participate as a researcher for this study, we will need to gather some information from you so that we can communicate with you properly and quickly. This information will not be used or disclosed for other than research purposes of this study. No personal information will be sold or divulged outside of CHAI. The information you provide may be required for submission of the study. The purpose of this request is to be prepared in advance.
